

Technical Bulletin

ICC-ES ESR-1295 - Insulspan SIP System

(12 pages attached)

ICC Evaluation Service, Inc. (ICC-ES) is the most widely recognized national evaluation body in the United States that does technical evaluations of building products, components, methods, and materials for compliance with code. ICC-ES evaluation reports are readily available to code officials, contractors, specifiers, architects, engineers, and anyone else with an interest in the building industry and construction on their website at www.icc-es.org.

ESR-1295 provides evidence that the Insulspan SIP System is a suitable alternative to methods of construction described in the codes noted below, subject to the conditions of use detailed in section 5.0 of the evaluation report:

- 2006, 2009 and 2012 International Building Code[®]
- 2006, 2009 and 2012 International Residential Code[®]

ESR-1295 includes a Florida Building Code (FBC) Supplement. The FBC Supplement confirms that the Insulspan SIP System complies with the 2007 and 2010 Florida Building Code – Residential and Florida Building Code – Building. The Florida Building Code Supplement was used to support FBC product approvals FL# 6484 (for wall applications) and FL# 14289 (for roof applications). Copies of the FBC product approval listings are available at http://www.floridabuilding.org/pr/pr_app_srch.aspx.

A copy of the current version of ICC-ES ESR-1295 report is attached for additional detail.
